No Whiskey!

Brown's Iron Bitters is one of the very few tonic medicines that are not composed mostly of alcohol or whiskey, thus becoming a fruitful source of intemperance by promoting a desire for them.

Brown's Iron Bitters is guaranteed to be a non-intoxicating stimulant, and it will, in nearly every case, take the place of all liquor, and at the same time absolutely kill the desire for whiskey and other intoxicating beverages.

Rev. G. W. Rice, editor of the American Christian Register, says of Brown's Iron Bitters:

On Nov. 16, 1882, I wrote: "The foolish wasting of vitality in business pleasure, and vicious indulgence of our people makes a necessity, and if applied, will save thousands who resort to saloons for temporary recuperation."

Brown's Iron Bitters has been thoroughly tested for dyspepsia, indigestion, biliousness, weakness, debility, overwork, rheumatism, neuralgia, consumption, liver complaints, kidney troubles, etc., and it never fails to render speedy and permanent relief.

Bricklayers & Stone Masons

R. J. BURKE

CONTRACTORS AND BUILDERS.

All kinds of Mill Work, Furnaces and Boilers done in a good workmanlike manner.

COAST NEWS.

As a household word, none is more familiar than St. Jacobs Oil, the great pain-cure.

The first carload of California grapes sent East this season was shipped Wednesday.

Mme. Angela Peralta de Casters, the Mexican Nightingale, is creating a furor at Guaymas.

The work of surveying the railroad line from Billings, M. T., to Bull Mountain, has commenced.

A cottonwood log was found 24 feet below the surface by some well-diggers near Miles City, M. T., last week.

38,000 pounds of flour were sent to the hungry Blackfeet agency Indians in Montana Territory last week from Benton.

Mrs. Nancy H. Deuel, a prominent school teacher, wife of J. F. Deuel, died at Oroville on the 24th instant, aged 51 years.

A little child of Frank Marshall, a telegraph operator stationed near Bodemann, M. T., was drowned in a creek near its home last week.

King Kalakaua, it is confidently asserted, will visit San Francisco to participate in the grand doings during the Knights Templar's Conclave.

The Northern Pacific Railroad will not receive for transportation liquors or wine of any kind consigned to places within Indian reservations.

Joe Lawrence, of Nevada City, has been held to answer to the charge of assault with attempt to commit rape on his 15-year-old step daughter.

Henry A. Caulfield, a well-known character who was sent to San Quentin a few years since for the killing of William English, will return to Sacramento in a few days.

Last winter, John Ward made a trade for a piece of land near Nelson Station, Cal., paying \$5,250 for the same. The land was rented at the time, and about a week ago the crop was thrashed and sold for \$4,940.

John Gates, aged about 24 years and an employe of John D. Gear, of Riparia, W. T., was drowned at that place last week while assisting in unloading a boat. His mother lives in California.

"Poker Jack," a St. Louis gambler, won 200 horses and three squaws at the recent Indian horse-racing match near the Idaho line. "Culians" are cheap at present among the Indians and can be obtained for \$3 or \$4, such as they are.

"The common scold of Bullion Ravine," Virginia, Nev., is said to be again making it lively for the residents of that locality. The annoyance became so great that a next-door neighbor a few months ago tore down his house and moved it from the locality of the scold.

The huge, drastic, gripping, sickening pills are fast being superseded by Dr. Pierce's "Purgative Pellets." Sold by druggists.

Reliable help for the weak, nervous and debilitated dyspeptic sufferer, found in Bowditch's Bitters.

The finest brand of Kelly's celebrated Key West Cigars are to be had at John F. Myers' Drug Store on Virginia street, next to Barnett's.

Of every description sold cheap by John F. Myers, Virginia street, next to Barnett's.

For cheap Drugs, Toilet Articles, Patent Medicines, Perfumery, etc., call at John F. Myers' Drug Store, Virginia street, next to Barnett's.

"Invigorator's Food" For the brain and nerves is what we need in these days of rush and worry. Parker's Ginger Tonic restores the vital energies and brings about health and joyous application than anything you can use. Tribune.

AN ATTRACTIVE PLACE

Having just received one of the finest stocks of Men's and Boys' Clothing, Gents' Furnishing Goods, Hats, Caps, Boots and Shoes ever brought to this State, I invite my friends and the public generally to give me a call. My prices are lower than ever, and my patrons are sure to be well pleased. Great Bargains in dull times is what we all want. Call at my store and be convinced.

SLIGHT ODDS.

A Little Story with a Large Moral

—One Man who Knew his Own Business.

"No, my dear," said the venerable keeper of a country store to a timid little girl whose head scarcely came up to the level of the counter. "No, my dear, we haven't any red flannel, but we have some very fine New Orleans molasses." Sorry, thinking she didn't think that would answer the purpose quite as well, the child went her way in search of the article she wanted.

"Have you BENSON'S CAPSICUM PLASTER?" asked a gentleman of a certain rugged whose name could be given were it desired. "I am troubled just now with a touch of my old friend, the lumbago, and the Benson Plaster seems to go to the spot almost as soon as it touches the skin."

"Not at present," replied the druggist gently, "but we have lots of plaster just as good. There is Allcock's, the Capstick and others—won't one of them do as well?"

"My dear sir," retorted the gentleman, with a slight show of temper, "I say nothing against those articles, but I am a business man, and always ask for precisely what I want, and for nothing else. I may enlighten you, however, when I say that some time ago, for another disease, of which the Capsicum has since cured me, I tried all those you mention, with no appreciable benefit. They are inefficient, every one of them; the most set off the proprietors of some of them being that they make plaster with similar sounding names to deceive the unwary into believing they are the same thing. Experience taught me the difference. I'll go to the next man in your line. Good day."

"Not at present," replied the druggist gently, "but we have lots of plaster just as good. There is Allcock's, the Capstick and others—won't one of them do as well?"

"My dear sir," retorted the gentleman, with a slight show of temper, "I say nothing against those articles, but I am a business man, and always ask for precisely what I want, and for nothing else. I may enlighten you, however, when I say that some time ago, for another disease, of which the Capsicum has since cured me, I tried all those you mention, with no appreciable benefit. They are inefficient, every one of them; the most set off the proprietors of some of them being that they make plaster with similar sounding names to deceive the unwary into believing they are the same thing. Experience taught me the difference. I'll go to the next man in your line. Good day."

"Not at present," replied the druggist gently, "but we have lots of plaster just as good. There is Allcock's, the Capstick and others—won't one of them do as well?"

"My dear sir," retorted the gentleman, with a slight show of temper, "I say nothing against those articles, but I am a business man, and always ask for precisely what I want, and for nothing else. I may enlighten you, however, when I say that some time ago, for another disease, of which the Capsicum has since cured me, I tried all those you mention, with no appreciable benefit. THE COMING CONTEST

Some interest is being manifested by the managers, but not much among the general public, in the seat in the Senate, which becomes vacant March 4th, 1885. It is thought that Senator Jones is making a double lead for himself, by trying to turn the State to the Starwars in the next national convention, and at the same time secure his own reelection. The Senator has many friends in the State, and could probably take care of his own fight easily enough. He has the manipulating of the offices, unless the new civil service rules interfere, and has also the prestige of possession. The Democrats and California bank are doubtless friendly enough, unless some of the owners get the fever themselves, which is very unlikely. Sharon is said to be for Jones, and Mackay talks favorably. Ex-Congressman Thos. Wren might be willing, and he is worthy of support from the Republican party. He would make a very respectable canvass. W. B. Bishop is keeping up his residence in Nevada and living in San Francisco, so that he may be a dangerous rival. Senator M. D. Foley of Eureka has done much for the party, and would carry weight in the west as well as at home. He is young, wealthy, has personal magnetism and is a rising man. For once, Washoe is not suspected, at least as yet, of having a candidate. The Democrats have Congressman Cassidy to talk about, with several San Francisco millionaires to hear from.

The Parisian press is ridiculing Professor Boujon because of his assertion that the faculty of speech may be developed in the lowest of animals. Nevertheless, says the San Francisco Exchange, the Professor is right. For instance, look at the case of Kearney. True, his speech is utterly devoid of all sense, but then, it is a speech just the same; and, besides, consider the extreme lowness of the animal.

WESTERN DISPATCHES

[PRESS DISPATCHES TO THE GAZETTE.]

SAN FRANCISCO NEWS.

A Crowded Steamer—Bound Over-Retains Certificate—Falls.

SAN FRANCISCO, July 25.

On the trip of the steamer Honoluli from London via Honolulu to this port, the measles broke out among the children, and before Honolulu was reached, whooping-cough and diarrhoea appeared, which carried off 55 children. Three women also died on the voyage, and twenty births occurred. The steamer had on board 1,511 souls; emigrants from the islands of Madeira and St. Michaels, who were booked for Honolulu.

August Belmore, charged with the murder of Jack Kelly, has been bound over for trial on a charge of manslaughter. He was released on furnishing \$5,000 bail.

Out of 7,977 return certificates, issued to Chinese, only 2,000 have been returned to the United States.

T. G. Edwards & Co., carpet-dealers, have failed—liabilities estimated at \$75,000. Edwards claims to have sufficient assets to pay in full, if allowed time.

Railroad Cases.

SAN FRANCISCO, July 25.

The testimony in favor of the railroad tax cases was concluded yesterday as follows: Sacramento county vs. the Central Pacific Railroad Company, two cases; Santa Cruz county vs. the Santa Cruz Railroad Company; Colusa county vs. the Northern Railway Company. Wednesday next is fixed for the argument. The cases are all expected to be concluded by the end of next week. Justice Field stated that no more than three counsel on each side should argue the leading case. Each side is limited to two hours.

The Union Company, the recently bought the Mansion House in Providence, Rhode Island, occupied and formerly owned by Mrs. Fanny Sprague, the mother of ex-Senator Sprague, offer her a lease of the property during her life for the nominal sum of \$1 per month.

EASTERN DISPATCHES.

[PRESS DISPATCHES TO THE GAZETTE.]

The Honest Republican Party.

WASHINGTON, July 25.

The Commissioner of Internal Revenue has written to Secretary Folger that in his office all collections of internal revenue, 126 in number, were carefully examined before the close of the last fiscal year ending June 30, 1883, and the entire collections of internal revenue of that year, amounting to \$144,000,000, have not only been accounted for, but paid into the treasury. My predecessor, Hon. Green B. Raum, in his report to you, dated July 25, 1882, said that during the past six fiscal years some \$748,831,071 has been collected from internal revenue taxation and paid into the treasury without any loss by defalcation. The expense of collection for the last fiscal year, including the expenses of this office, will be found in the fiscal adjustment not to exceed \$5,108,390, or less than three and one-half per cent. on the amount collected. The expenses of collection for the past six years has been about \$27,057,300 or three and six-tenths per cent. on the amount collected. This sum has been disbursed without loss to the Government.

Notwithstanding material changes were made in the law by an Act of Congress, March 3, 1883, yet so large was the increase of taxes derived from distilled spirits, that for the year ending June 30, 1883, there were collected \$144,553,366 of internal revenue. The collection of this vast sum cost the Government about \$5,120,000, a percentage of 3½, and the money was disbursed without any loss to the United States. It gives me pleasure to state that the reports of Collectors and internal revenue agents indicate not only a very satisfactory condition of the service as respects its efficiency, but also that no combinations exist to defraud the Government of its internal revenues, nor is it believed that any important efforts are being made for the illicit manufacture of either whisky, tobacco or cigars. Much praise is justly due the officers in the service, for the zeal and efficiency with which their very important duties are discharged. The executive order of June 25, 1883, directing the consolidation of revenue districts, is being executed as rapidly as the great labor will permit.

Honor to the Dead.

WASHINGTON, July 27.

The Postmaster General issued the following orders as a mark of respect to the late Hon. Montgomery Blair, ex-Postmaster General: It is hereby directed that the Postoffice Department building be draped in mourning for the period of 30 days from this date; that the flag on the building be placed at half-mast until after the burial of the deceased ex-Postmaster General; that the Department be closed on Monday, July 30th, the day of his funeral.

A general order was issued from the headquarters of the army to-day, announcing the death of General Ord, concluding as follows: Distinguished among his country's defenders, General Ord was a soldier of national repute. Through his long military service, reaching towards a half a century, his career has been marked by a faithful, devoted, intelligent discharge of his duty, by a personal gallantry, by honest administration, by firmness which was not weakened by his great kindness of heart. His intimate associates since boyhood express a general testimony of him, that a more unselfish, manly and patriotic person never lived.

Carrying the War into Africa.

St. Louis, July 25.

The Saloon-keepers' Protective Association yesterday afternoon adopted a resolution to keep saloons open on Sunday, and also expels members of the Association who take a different course.

Mayor Ewing sent a communication to the City Court last night informing that body of their action, looking to his impeachment as unconstitutional, and that he does not propose to recognize it or pay attention to anything they may do in that direction. The Council proceeded, however, to trial.

Aid and Comfort.

INDIANAPOLIS, July 25.

The Board of Trade appointed a Commission to-day to issue a call for a meeting of representatives of all Boards of Trade in the Mississippi Valley at this city Tuesday next, to consider matters in connection with the telegraphers' strike and to confer with the officers of the Western Union Telegraph Company.

A Terrible Railroad Disaster and Great Loss of Life.

ROCHESTER, N. Y., July 25.

News was received here early this morning of a terrible disaster on the R. W. and O. R. R., near Carlton, last night. As the Thousand Island train, which was moving at a high rate of speed for the main line, neared Carlton, the engineer noticed a single car standing on the track ahead of him; he at once put on the air brakes and reversed the lever of his engine,

but before the speed of the train could be slackened, the engine dashed into the obstruction and, in an instant, all was a scene of wreck and confusion, and the air was filled with the groans of the dying and injured. The engineer, who heroically remained at his post, was fatally injured, and when the crash came the fireman, who stood by him till the last, was instantly killed. Assistance was telegraphed for at Charlotte, a distance of 25 miles. On the arrival of aid, the work of rescuing the wounded and taking care of the dead from the wreck was begun. So far as can be learned at present, the car which caused the disaster was blown on to the main line from a branch track by a high wind, which prevailed at the time of the accident. It is supposed that the Rev. Dr. Alwood of Canton, and the Rev. Dr. Fluke of Syracuse were passengers on the ill-fated train. Fourteen dead bodies were taken out of the wreck at last advice. Among the killed and wounded are Henry McCormick of Benton, Michigan; Louis France, fireman, killed; Archer Taylor of Watertown, baggage-man, killed; Mrs. Jenkinson of Philadelphia, hip broken; Mrs. Brooks of Philadelphia, a friend of Mrs. Jenkinson, is still in the wreck. Two ladies named Hall were fatally hurt; Transmaster Chancy of Oswego, fatally hurt; engineer McCarty, fatally scalded; W. Rockefeller, foreman in the shops at Oswego, leg broken. The engine is totally wrecked, and the fireman, Louis France, is mangled beyond recognition. From 15 to 18 passengers are reported injured; many were killed outright and many others left in a dying condition. The suffering of the wounded is terrible. A whole family named Brooks is believed to be burned in the wreck.

A Blow in Texas.

GALVESTON, July 25.

The details of the storm Wednesday night on the outskirts of Fort Worth, show that it was disastrous throughout the Northwest. Three men were injured, perhaps fatally, three large buildings blown from their foundations, three unfinished structures blown down, and a number of sheds and outbuildings demolished; also a couple of residences and one warehouse more or less damaged. A large windmill was toppled over, and a tent in use as a temporary hospital was carried away, leaving the patients at the mercy of the elements for some little time.

Resignation of an Office-Holder.

NEW YORK, July 27.

Comptroller Allen Campbell has resigned, failing health and need of absolute rest is assigned as the cause. The recent disclosures of defalcation in the finance department by a clerk now dead, and newspaper articles thereon, is said to have aggravated the disease of the comptroller and precipitated the resignation.

Pincky Railroaders.

HARRISBURG, Pa., July 7.

Five cars and an engine on the Cumberland railroad train were wrecked. The cars were full of passengers, and yet no person was injured. The engineer and fireman stuck to the engine and were thrown a considerable distance. The accident was caused by running over a cow. Loss, \$20,000.

The Soldiers' Secularists.

COLUMBUS, Ohio, July 25.

The national reunion closed yesterday with a grand parade. One feature was the presence of representatives of the wars of 1776, 1812, Seminole, Mexican and the Rebellion.

TELEGRAPHIC BRIEFS.

—Ravages by the cotton worm and the rapid rise of the Nile cause great anxiety in Alexandria.

—The Belgian Chamber of Deputies has fixed the duty on manufactured tobacco at 75 francs on 100 kilograms.

—The Massachusetts Legislature adjourned yesterday, after having been in session 208 days—the longest on record.

—The Terra Cotta Works at Denver burned early this morning. It is thought to be incendiary. Loss \$28,000; insured for \$11,000.

—James H. Willins, the joint agent for the New York Central and Erie stock yards at Buffalo, is missing with \$5,000 of misappropriated funds.

—Preston, the acting Director of the Mint, directs that no melting charge be imposed on trade dollars deposited at the Mint on account of silver bullion.

—Kansas got a good rain yesterday, and will get a good corn crop. Oats will be abundant, some fields yielding a hundred bushels to the acre. Wheat will be up to the average.

—A severe thunder storm at Toronto, Canada, last evening, caused much damage. A young lady named Bunden, who was boating on the lake, was drowned. Several others are missing.

—The American Rapid Telegraph Company has notified the Baltimore and Ohio Telegraph Company that it cannot receive messages from that company to be forwarded over the American Rapid wires; the operators refusing to handle them.

FOREIGN DISPATCHES

[PRESS DISPATCHES TO THE GAZETTE.]

A Hostile Demonstration.

ZANZIBAR, July 25.

The Royal Geographical Society expedition to Lake Victoria was compelled to retreat May 24th, when in latitude 3 deg. 5 min. North and longitude 29 deg. East, in consequence of the hostile demonstrations of the natives. The expedition is now making another attempt to continue their explorations.

The Sick Man Shut Out.

CONSTANTINOPLE, July 25.

It is reported that Germany has refused to conclude a treaty admitting Turkey to the Triple Alliance, but has promised assistance should the Porte appeal for aid or protection.

Deaths From Cholera.

ALEXANDRIA, July 25.

There were 277 deaths from cholera at Cairo yesterday. Among the number were three British soldiers. At Chibbi 105 deaths, Mehalia 52, Tantah 28, Ismailia 27, including one British soldier.

CAIRO, July 25.

There was a rapid decrease in the number of deaths from cholera in the Boulak quarter of this city yesterday. One thousand one hundred inhabitants have removed to Bahah.

—A steamship arrived in Baltimore to-day from the West Indies, with four cases of yellow fever on board.

The Western Union to-day removed the notices, "Subject to delay," and hereafter all business will be taken as before.

—A terrible accident occurred on the Rome, Watertown & Ogdensburg Railroad last night; 17 killed and 14 wounded.

—The Catholic Bishops at Berlin have ordered to return to Prussia all vicars and candidates for the priesthood.

—At Nashville, Tennessee, counsel for defense in the Polk case have entered a motion for a new trial, on the ground of incompetency of the jury.

—The Corporation Mills at Vesie, Maine, are burning, and the Block Mills are already destroyed. The mills were operated by Cutter and Eddy, the men who owned the mill recently burned at Bradley, Maine.

—The Presiding Elder at New York refuses to surrender Geo. A. Brisson's credentials as a minister. He holds them as the property of the Conference and thinks he has no right to dispose of them without its authority.

ROYAL

BAKING POWDER

Absolutely Pure.

This Powder never varies. A marvel of purity, strength and wholesomeness. More economical than the ordinary kinds, and cannot be sold in competition with the magnitude of low test, short weight, stale or phosphated powders. Sold only in cans.

ROYAL BAKING POWDER COMPANY, 224 N. 7th St., St. Louis, Mo.

Dress-Making and Millinery

MESDAMES WINZELL & WERRILL are prepared to do dress-making and all kinds of millinery work on the shortest possible notice. Their stock is of the latest styles.

They Employ the Most Experienced Help.

Satisfaction Guaranteed.

July 1883.

WE MENTION THE FOLLOWING LEADING PERFORMERS:

The world-famous and universal genius,

GEORGE HOLLAND, Superb Bareback Equestrian.

The undisputed Empress of the Arena,

MISS MINNIE WALKER, Female Bareback Equestrian, whose princely salary of \$1,000 per week is equal to the combined salaries of most ordinary showmen.

PROF. SAMUELSON, whose wonderful

trained dogs, goats, monkeys, bears,

horses, camels, oxen and ponies constitute one of the most extraordinary

schools.

ROSEBAUGH FAMILY of Five People,

William, Elsie, Tommy, Elsie and Charles,

in starting mid-air specialty acts, including somersaults, Lechells and trapezes; also high-wire bicycle riders.

EDWARD HOLLAND, a gymnast of

surpassing prowess, in wonderful performances with the magic cross and enchanted barrel.

MONSIEUR MONKEY, WM. DEAROUS.

The man-monkey, WM. DEAROUS, the

modern Hercules and female Samson,

the most extraordinary specimens of

man-monkey in the world.

ADAM SANDREUSE, Emperor of

Equestrians, in his unequalled bareback act.

MR. WILLIAM MARKS, undisputed

champion four-horse bare-back rider.

HUNT FAMILY, Three in number, riders

extraordinary, in wonderful carrying acts.

MISS KATE WOLLDWAY, the brilliant

and bewitching equestrienne and artistic

trick rider.

MILLS CON-TANTINA MICHEL, the

dashing bareback rider,

LEON FAMILY, Three in number, gymnasts

and equilibrists, in their original ring act, cut-aways, balancing and

standing on their heads in mid-air on the trapeze.

JOHN LOWLOW,

paragon of Clowns and Prince of Good

Fellows. He is recognized without a

competitor. His associate, MR. WAT.

ARM, is distinguished for his sarcastic humor.

KLOTZ, acrobatic juggler, oriental

illusionist and unrivaled balancer.

AH KUNG JUNG, Chinese juggler extra-

ordinary.

MISS KATE STONE, the charming

equestrienne in her bareback hurdle act.

ALICE FAMILY, Six in number, aerial

and acrobatic artists.

DOUGLEYS, Contortionists extra-

ordinary. MISS LAURA ARSTON, the

woman of the iron jaw. MISS NELLIE

ADENIA, who slides from the dome of

the canvas by the hair of her head.

THE CLARKS—in startling, hoop, le

verche and aerial acts. ZURAKE FAMILY,

celebrated Russian athletes,

KIDNERS, ACROBATS, SPECIALISTS,

and others, too numerous to mention for lack of space.

P. E. PLATT, JEWELER

W. R. STRONG & CO.,

THE BLDWELL STAGE WENT OUT
The Bldwell stage went out loaded this morning.

The body of Carrie Daws arrived from below by this morning's train. Jake Becker keeps a nice, quiet place, and his Fredricksburg beer is very fine.

Jewelry made and repaired at Nasby's. Thermometer at 7, 9, 11, 1, 3-50, 84, 85, 86, 88.

George Becker will set out his usual Sunday lunch to-morrow. Call in and sample his Pacific beer.

Knowles & Balbridge are selling tinware very cheap. They carry the best stock of any firm on the coast.

George Becker runs one two-horse team all the time, delivering his Pacific beer to his town customers.

Some unfeeling person tied a horse in front of the Baptist Church, and let him stand in the hot sun all afternoon.

A veterinary authority says the great majority of ringbones in young horses comes from the failure to shorten their toes.

J. E. Everett is still at the old corner with a better stock than ever before. Families will find it advantageous to trade with him.

M. Logan, who was fined by Judge Boardman for contempt of Court, paid his fine and costs yesterday and returned to his ranch.

The advantages Lindley & Co. possess over other dealers enable them to supply families with groceries at lower prices than ever before.

Three car-loads of beavers, shipped by Sweetser & Stauffer, Winchester, and consigned to A. T. Sweetser, Suisun, California, passed west last night.

Levy & Bro. are reducing their summer stock preparatory to clearing away for the fall trade. Now is the time to buy goods cheap. Call on them the coming week.

Eastern manufacturers of wagons, carriages and farming implements are reaping a rich harvest from their sales on the Pacific coast. Large shipments pass Reno daily.

Shave Saturday night and be happy. To get fixed just right, however, it is necessary to go to John Beis, for he has the best artists and can do work better than anybody.

Travelers will find the Palace Hotel one of the best in the land. You can get a nice room, elegantly furnished, with clean, soft bed, for 50 cents. Connected with the house is one of the best restaurants in the State, where meals are served for 60 cents.

J. B. Gunther, the pioneer harness maker, has just returned from San Francisco, where he laid in a large stock of new goods. Farmers and liverymen in Western Nevada will find it greatly to their advantage to buy their harness, etc., at Gunther's.

PERSONALS

Governor J. H. Kinkaid is in town to-day.

Senator Marker went to Sierra Valley to-day and will come in at Truckee.

John Horsetman and E. F. Gray, soda men, went to Wadsworth this morning.

E. McArthur, a prominent lumber manufacturer of Milwaukee, went east this morning.

"Brownie," one of Wells-Fargo's messengers on the C. & C., was at the depot this morning.

Alvaro Evans returned from the Genoa Hot Springs yesterday, very much improved from his rheumatic attack.

J. H. Whitehead, the Division Superintendent of the Truckee division of the C. P., was at the Depot Hotel last evening.

Frederic Murray, an engineer on the C. & C., accompanied his wife to Reno this morning, who went to Wadsworth to visit relatives.

Governor Adams and the newly appointed County Commissioner of Storey county, John S. Kaneen, came down from the Comstock last evening.

E. L. McCall, brother-in-law of E. H. Hoy, who has been spending a few weeks in Reno, went south this morning, to again take charge of the New Boston mill, in Esmeralda county.

Ward Court.
In the case of the Central Drain Ditch Co. vs. North Truckee Drain Co., Judge Boardman denied the preliminary injunction asked. This ruling is not final, it is understood, as the case is yet to be tried, but is based upon the ground that the Court is not fully satisfied upon the evidence submitted, that the right is with the plaintiff.

The Summit House Fracas.
Frank Rogers, who formerly lived in Reno, is the name of the young man who was shot in the face at the Summit House by Joe Olson. It is said the wounded man will come out all right. Olson, since he became sober, is greatly distressed, and it will probably teach him a lesson.

Will Lecture.
Professor Granville H. Foster will deliver another of his interesting and instructive lectures at the Congregational church next Sunday evening at 8 o'clock. Subject, "Palaeontology and Phenology."

CAMPBELL PROCESS

How the Ore is Manipulated and the Results.

MINING OPERATORS WELL IMPRESSED

Several Works Erected in the Mining Territories.

CRUDE PETROLEUM

The mining and scientific press regards the Campbell process with favor. The ore is crushed to pass through a 20-mesh screen and then goes into a funnel at the top of the roasting furnace, a stack six feet in diameter and twenty-four feet high, made of heavy boiler-iron and lined with fire-brick. As the ore from the funnel dropping by its own weight enters the furnace, it is struck by a steam exhaust, which imparts to it a rotary motion, causing it to spread out evenly and fill the interior of the tube. Two apertures at the bottom of the furnace, on opposite sides, are entered each by an iron nozzle, through which is kept up a constant flow of burning

CRUDE PETROLEUM, and the flame is driven into and up the furnace, creating an intense heat. The falling ore, retarded in its descent by its swirling motion and the upward current of hot air, is subjected to a thorough roasting before it reaches the pit prepared for its reception at the bottom of the furnace. This petroleum, kept in a large cask elevated above and at some distance from the furnace, to which it is fed through a connecting pipe, proves to be a cheap and otherwise serviceable fuel, costing but six cents per gallon, from four to six gallons sufficing, on an average, to roast one ton of ore. When once the furnace is brought to a high temperature, not over two or three gallons of oil are required for roasting ores that carry a large percentage of sulphur, as that mineral, when heated to the point of combustion, becomes itself a fuel, greatly assisting to feed the flames.

The ore, which in its passage through the flames becomes almost wholly desulphurized, drops into a brick inclosure beneath the furnace, whence it is hauled out on a cooling floor. Here such amount of iron as may be necessary for fluxing is added, after which it is removed to another apartment containing

THE LEAD BATH AND PLUNGER.
The most novel, as well as noticeable feature of the new process, and which may be described as an oblong nearly rectangular iron vessel, or receiver, inclosed on all sides and capable of containing 4,000 pounds or more of melted lead. Projecting upwards from one side of this vessel, near the bottom, is an iron pipe, ten inches in diameter and open at the top. The vessel stands over an oven, which being heated with charcoal, brings its contents up to the proper temperature, and so maintains them while work is going on. From one and a half to two tons of lead having been placed in the bath, or receiver, fire is applied in the oven beneath and the metal brought into a molten state. This done, a quantity of ore is thrown into the iron pipe and by means of a pestle-shaped plunger, that works up and down in the latter, is forced through the mass of molten lead, the greater buoyancy of the ore bringing it speedily to the surface. In its passage through the lead, the ore takes from 30 to 40 per cent. of that metal. Coming out top and there remaining, the dry ore so mixed mechanically with lead is taken up on a shovel and removed from the bath through an opening in its upper side. Thrown in a heap, the heated mass is cooled with a spray of water, after which it is weighed and passed into the smelter, the quantity of lime required for fluxing, determined also by weighing, having previously been added. Charging the ore in this manner with lead converts an otherwise non-smelting into a smelting ore, into which condition it readily takes up the silver and gold. The lead is not here used instead of quicksilver for amalgamating the precious metals, but as an agent for promoting smelting.

RECAPITULATING THE STRONG POINTS.
As this process has now passed through its experimental stages, during which it was subjected to the most crucial tests, some of which suggested important alterations and amendments, it is possible to speak of the results reached by it with a good degree of confidence. Summarizing what seem to be its more patent advantages, as explained by the managers, the following points are presented:

1st. The item of cheapness; the managers stating that ores of the most base and obstinate kind may be worked by the method described at the average cost of less than \$8 per ton.

2d. Effectiveness. We are told that the precious metals contained in any ore, however refractory, may be extracted to within three or four per cent. of results obtained by the average cost of less than \$8 per ton.

3d. Effectiveness. We are told that the precious metals contained in any ore, however refractory, may be extracted to within three or four per cent. of results obtained by the average cost of less than \$8 per ton.

4th. Effectiveness. We are told that the precious metals contained in any ore, however refractory, may be extracted to within three or four per cent. of results obtained by the average cost of less than \$8 per ton.

5th. Effectiveness. We are told that the precious metals contained in any ore, however refractory, may be extracted to within three or four per cent. of results obtained by the average cost of less than \$8 per ton.

6th. Effectiveness. We are told that the precious metals contained in any ore, however refractory, may be extracted to within three or four per cent. of results obtained by the average cost of less than \$8 per ton.

7th. Effectiveness. We are told that the precious metals contained in any ore, however refractory, may be extracted to within three or four per cent. of results obtained by the average cost of less than \$8 per ton.

8th. Effectiveness. We are told that the precious metals contained in any ore, however refractory, may be extracted to within three or four per cent. of results obtained by the average cost of less than \$8 per ton.

9th. Effectiveness. We are told that the precious metals contained in any ore, however refractory, may be extracted to within three or four per cent. of results obtained by the average cost of less than \$8 per ton.

10th. Effectiveness. We are told that the precious metals contained in any ore, however refractory, may be extracted to within three or four per cent. of results obtained by the average cost of less than \$8 per ton.

11th. Effectiveness. We are told that the precious metals contained in any ore, however refractory, may be extracted to within three or four per cent. of results obtained by the average cost of less than \$8 per ton.

12th. Effectiveness. We are told that the precious metals contained in any ore, however refractory, may be extracted to within three or four per cent. of results obtained by the average cost of less than \$8 per ton.

13th. Effectiveness. We are told that the precious metals contained in any ore, however refractory, may be extracted to within three or four per cent. of results obtained by the average cost of less than \$8 per ton.

14th. Effectiveness. We are told that the precious metals contained in any ore, however refractory, may be extracted to within three or four per cent. of results obtained by the average cost of less than \$8 per ton.

15th. Effectiveness. We are told that the precious metals contained in any ore, however refractory, may be extracted to within three or four per cent. of results obtained by the average cost of less than \$8 per ton.

16th. Effectiveness. We are told that the precious metals contained in any ore, however refractory, may be extracted to within three or four per cent. of results obtained by the average cost of less than \$8 per ton.

17th. Effectiveness. We are told that the precious metals contained in any ore, however refractory, may be extracted to within three or four per cent. of results obtained by the average cost of less than \$8 per ton.

18th. Effectiveness. We are told that the precious metals contained in any ore, however refractory, may be extracted to within three or four per cent. of results obtained by the average cost of less than \$8 per ton.

19th. Effectiveness. We are told that the precious metals contained in any ore, however refractory, may be extracted to within three or four per cent. of results obtained by the average cost of less than \$8 per ton.

20th. Effectiveness. We are told that the precious metals contained in any ore, however refractory, may be extracted to within three or four per cent. of results obtained by the average cost of less than \$8 per ton.

21st. Effectiveness. We are told that the precious metals contained in any ore, however refractory, may be extracted to within three or four per cent. of results obtained by the average cost of less than \$8 per ton.

22nd. Effectiveness. We are told that the precious metals contained in any ore, however refractory, may be extracted to within three or four per cent. of results obtained by the average cost of less than \$8 per ton.

23rd. Effectiveness. We are told that the precious metals contained in any ore, however refractory, may be extracted to within three or four per cent. of results obtained by the average cost of less than \$8 per ton.

24th. Effectiveness. We are told that the precious metals contained in any ore, however refractory, may be extracted to within three or four per cent. of results obtained by the average cost of less than \$8 per ton.

25th. Effectiveness. We are told that the precious metals contained in any ore, however refractory, may be extracted to within three or four per cent. of results obtained by the average cost of less than \$8 per ton.

26th. Effectiveness. We are told that the precious metals contained in any ore, however refractory, may be extracted to within three or four per cent. of results obtained by the average cost of less than \$8 per ton.

27th. Effectiveness. We are told that the precious metals contained in any ore, however refractory, may be extracted to within three or four per cent. of results obtained by the average cost of less than \$8 per ton.

28th. Effectiveness. We are told that the precious metals contained in any ore, however refractory, may be extracted to within three or four per cent. of results obtained by the average cost of less than \$8 per ton.

29th. Effectiveness. We are told that the precious metals contained in any ore, however refractory, may be extracted to within three or four per cent. of results obtained by the average cost of less than \$8 per ton.

30th. Effectiveness. We are told that the precious metals contained in any ore, however refractory, may be extracted to within three or four per cent. of results obtained by the average cost of less than \$8 per ton.

31st. Effectiveness. We are told that the precious metals contained in any ore, however refractory, may be extracted to within three or four per cent. of results obtained by the average cost of less than \$8 per ton.

32nd. Effectiveness. We are told that the precious metals contained in any ore, however refractory, may be extracted to within three or four per cent. of results obtained by the average cost of less than \$8 per ton.

33rd. Effectiveness. We are told that the precious metals contained in any ore, however refractory, may be extracted to within three or four per cent. of results obtained by the average cost of less than \$8 per ton.

34th. Effectiveness. We are told that the precious metals contained in any ore, however refractory, may be extracted to within three or four per cent. of results obtained by the average cost of less than \$8 per ton.

35th. Effectiveness. We are told that the precious metals contained in any ore, however refractory, may be extracted to within three or four per cent. of results obtained by the average cost of less than \$8 per ton.

abilities in this respect, it may be stated that the works of the company are now and for some time past have been running on ore from the Manzanita mine, situated on the easterly slope of the Coast Range, in Colusa county. This ore, as rebellious, perhaps, as any in nature, and which had been given up as wholly intractable, after trial by the Swansea, Newark, Selby and other first-class metallurgical establishments, seems to surrender its gold under the Campbell process with the greatest readiness. As this ore carries, on an average, gold to the value of \$80 per ton, it can be reduced at these works with large profit, the cost of mining, transportation and treatment amounting to less than \$12 per ton. The Manzanita mine is said to contain a large body of this high grade, but exceedingly obstinate, ore. Lots of ore from other mines, distinguished for their base, have shown themselves docile when treated by this process.

3d. Adaptability to the treatment of a large school of ores incapable of being successfully handled by other methods, such as ores carrying too little lead for smelting, and too much for amalgamation.

4th. Uniformity and certainty of results: Be the ore what they may, the outcome of the Campbell process varies but little. The ore to be reduced having been carefully sampled and assayed, the product can be estimated with great closeness beforehand.

5th. Simplicity: As this process is without eccentricities, so are its manipulations few and easily understood. Any good assayer or practical metallurgist can master all there is about it in a very short time, care and skill rather than great scientific knowledge being essential on the part of those charged with the general supervision of the business. A point requiring much care is the addition of the proper fluxes, to ascertain which, frequent assays of the ore become necessary.

The Campbell process has been examined and its workings witnessed by a number of our leading mine owners, mill-men and metallurgists, who regard it with favor. The process pursued by Dr. Campbell, of quietly going on and perfecting his process, instead of seeking to prematurely advertise its merits, as has been too much the practice with this class of inventors, is the one to be commended. Besides the establishment in this city, a similar works have been put up and are now ready for operation at Idaho Springs, in the State of Colorado, the prospects being that many others will soon be erected at different points throughout our mining States and Territories.

SUSANVILLE ITEMS.
Interesting Notes from our North-
coast Neighbor:
SUSANVILLE, July 28.

Editor Gazette:—Last Tuesday was the hottest day of the season. The thermometer reached 104° in the shade; Wednesday, 100°; today, 98°. Tuesday, Wednesday and Thursday we were visited with much thunder and lightning but little rain.

There is an alarming amount of sickness here now, the disease being "bloody flux." A number of deaths have occurred from it. All families that can are leaving for cool camping grounds in the woods.

The town had a narrow escape from fire last night by the upsetting of a kerosene lamp. It was promptly extinguished with little loss. The house was so situated that there is little doubt but that if the fire had got a good start the entire business portion of the town would have been burned.

Parties here are suspected of killing fish with giant powder in Susan river. If caught in the act they will be liable to find it a very unprofitable business.

The hot weather and cooling moths are causing a large percentage of the young apples to drop from the trees. Rix.

Nevada Stone.
The railroad company has some fifteen men at work at Iron Point loading stone on the cars for a bridge on Bear river near Corinne. The Winnemucca Silver State says: An engine goes from here to the quarries every morning and remains during the day to get the place. The stone at Iron Point is said to be superior to any on the line of the road for building purposes.

Death of a Pioneer.
John K. Sale, a native of the State of Virginia, and who for many years in early days held county office in Nevada county, California, died in Indian Territory on the 13th instant. Mr. Sale carried the charter of a majority of the early arrivals in this country; liberal to improvidence and particularly appreciative of all that makes life enjoyable. Peace to his ashes.

A New and Popular Face Powder.
Ladies wishing to try a new and popular face powder can obtain sample packages free of charge at Queen's drug store. It may be had in three shades, blonde, brunette and white. Mr. Queen has just been appointed sole agent for this elegant powder in Reno, and all who wish to try it should call.

Count of State Money.
On Wednesday the Board of Examiners counted the money in the Treasury and found \$115,218 46 in coin, and \$30,059 75 in vouchers; also a \$330,000 school bond, \$145,000 in state bonds and \$150,000 in U. S. bonds.

STONE OR IRON.

Old Things are Passed Away, and all Things are Become New.
A correspondent of the *Rural Press* says: From time immemorial man has ground his bread with rock. Xenophon, 400 years B. C., mentions a town on the Euphrates river whose inhabitants subsisted by quarrying millstones and floating them down the river to Babylon, where they were exchanged for grain and produce. The American Indian hollowed out a cavity in a boulder, and in this primitive mortar he reduced his acorns to meal by bruising them with a pestle. But civilization in her rapid strides and bewildering changes is about to discard this time-honored custom among many others. There can be no doubt that the world's bread will soon be prepared with iron instead of rock. And no one can regret the change, for think of the tons of ground rock that man has eaten with his bread.

And who shall say how much this has contributed to that painful disease known as gravel, or stone in the bladder, or Bright's disease.

A few years ago a miller in Germany began experimenting with iron rollers as a substitute for the old "upper and nether millstones" in the manufacture of flour. But the idea which was there originated was destined, as has often happened in other cases, to be worked out and find its highest application on American soil. The iron roller, in the skillful hands of American genius, has quickly become a rival of the old method, and beyond a doubt will soon entirely displace it. The principal flouring mills on this coast have already introduced the new process, or are intending to do so. There are three roller mills in San Francisco, of which the Golden Gate turns out about 1,000 barrels of flour in a day of twenty-four hours. Sperry's roller mill in Stockton makes about 800 barrels per day. There is also a large New Process mill in Los Gatos. The Starr mill at Vallejo is being rebuilt. The new system has already crossed the Sierra Nevada, and Mr. Fugus of Reno has a complete and efficient roller mill.

There is little friction in crushing, the flour is not heated as by the old process of grinding. To sum up, the roller process gives more flour, whiter flour, purer flour, sweeter flour, more nutritious flour, and flour not injured by heating in process of manufacture. These considerations are sufficient to warrant the statement that the world's bread is here after to be made by the iron roller process.

He is Right, Too.
Storey County's new commissioner, John S. Kaneen, was in Reno this morning and was met by a *Gazette* reporter to whom he imparted the intelligence that county expenses up there had been reduced \$900 a month, with a prospect of cutting off \$200 more. He says the county hospital and the indigent fund are both too expensive. There is only \$338 in the general fund, and that will not pay expenses this month, so the county will soon be running on scrip, although taxes are nearly five cents on the dollar. Mr. Kaneen says he voted to appoint Pennoyer chief of the first department, not because he was a Republican, but because he was a good man.

An Engineer Killed.
By telegram the Carson *Tribune* learns that David M. Luke, an engineer in the Bulwer-Standard mill, at Bodie, was caught in the machinery Friday morning and instantly killed. Luke was well known in Carson and vicinity, having formerly been an engineer on the V. & T. R. R.

A Disappointing Night.
The Carson *Appeal* of yesterday morning says: Yesterday noon a white woman and a negro, both suggesting drug peddlers, were seen walking down Carson street arm in arm, perfectly oblivious to the fact that they were creating quite a sensation. The sympathy was all for the colored man.

R. E. QUEEN.
THE LEADING DRUGGIST AND APOTHECARY
—OF—
RENO, - - - NEVADA.

The Largest assortment of
DRUGS, MEDICINES AND CHEMICALS

Who favor me with their patronage.

All Orders from the Country Promptly attended to
AND SATISFACTION GUARANTEED.

Physicians' Prescriptions and Family Recipes Accurately and
Scientifically compounded from the very best of medicines.

A Bonanza Mansion.

A private letter received here, says the Carson *Appeal*, states that the new residence to be built by J. C. Flood on California street, San Francisco, will be the finest palace in the Union. It is to cost about \$5,000,000 without the furniture, which will cost perhaps \$2,000,000 more. In fact it is believed that it will be the most gorgeous private residence in the world. Every room in the building is to be frescoed by artists imported from Italy for that purpose. It is estimated that many of the pictures that John Mackay is now buying in Europe are intended for Flood's picture gallery in his new house.

DIED.
STRONG.—At Susanville, California, July 26, 1887, Freddie, son of F. S. and J. Strong, aged 3 years, 6 months and 16 days.
